SUPPLEMENTARY INFORMATION:

I. Abstract

This is a request for extension of a currently approved information collection.

Exempted fishing permits (EFPs), scientific research permits (SRPs), display permits, letters of acknowledgment (LOAs), and shark research fishery permits are issued under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) (16 U.S.C. § 1801 et seq.) and/or the Atlantic Tunas Convention Act (ATCA) (16 U.S.C. § 971 et seq.). Issuance of EFPs and related permits is necessary for the collection of Atlantic Highly Migratory Species (HMS) for public display and scientific research that requires exemption from regulations (e.g., seasons, prohibited species, authorized gear, minimum sizes) that otherwise may prohibit such collection. Display permits are issued for the collection of HMS for the purpose of public display, and a limited number of shark research fishery permits are issued for the collection of fishery-dependent data for future stock assessments and cooperative research with commercial fishermen to meet the shark research objectives of the Agency.

Regulations at 50 CFR § 600.745 and 50 CFR § 635.32 govern scientific research activity, exempted fishing, and exempted educational activities with respect to Atlantic HMS. Since the Magnuson-Stevens Act does not include scientific research within the definition of “fishing,” scientific research is exempt from this statute, and NMFS does not issue EFPs for bona fide research activities (e.g., research conducted from a research vessel and not a commercial or recreational fishing vessel) involving species that are only regulated under the Magnuson-Stevens Act (e.g., most species of sharks) and not under ATCA. NMFS requests copies of scientific research plans for these activities and indicates concurrence by issuing a

LOA to researchers to indicate that the proposed activity meets the definition of scientific research and is therefore exempt from regulation.

Scientific research is not exempt from regulation under ATCA. NMFS issues SRPs for collection of species managed under this statute (i.e., tunas, swordfish, billfish, and some shark species), which authorize researchers to collect Atlantic HMS from bona fide research vessels (e.g., NMFS or university research vessel). NMFS will issue an EFP when research/collection involving such species occurs from commercial or recreational fishing platforms.

To regulate these fishing activities, NMFS needs information to determine the justification for granting an EFP, LOA, SRP, display, or shark research fishery permit. The application requirements are detailed at 50 CFR 600.745(b)(2). Interim, annual, and no-catch/fishing reports must also be submitted to the Atlantic HMS Management Division within NMFS. The authority for NMFS requiring this information is found at 50 CFR 635.32.

NMFS has updated the burden estimates based on participation in the Atlantic HMS Management Division's exempted fishing program from 2018 to 2019 and the Shark Research Fishery from 2018 to 2019.
